BRAZING FURNACES

Abbott furnaces are custom designed to meet our customer specifications. Our commitment to technology and service has enabled Abbott to develop long-term business relationships with our customers.

ABBOTT FURNACE COMPANY employs a highly skilled work force to produce quality continuous belt furnaces and accessory products. In support of our original equipment manufacturing activities we also offer custom fabrication of replacement parts, repair service for a wide range of power and temperature controllers as well as calibration services.

<thead>
<tr>
<th>FEATURES</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Alloy or Ceramic Muffle</td>
<td>Pro-rated 5 year warranty on our ceramic muffle.</td>
</tr>
<tr>
<td>Electric Heating</td>
<td>Combination of wire and silicon carbide heating elements provides excellent temperature uniformity.</td>
</tr>
<tr>
<td>Gas Heating</td>
<td>Our gas heating systems incorporate ABBOTT’s “pulse-fire” technology.</td>
</tr>
<tr>
<td>Rapid Cooling System (Varicool)</td>
<td>Advanced cooling system combines both atmosphere and water-jacketed cooling technology into one economical unit.</td>
</tr>
<tr>
<td>Atmosphere Moisturizing</td>
<td>Utilized to alter furnace dewpoints to ensure proper atmosphere conditions.</td>
</tr>
<tr>
<td>Monitoring &amp; Control</td>
<td>Advanced computerized monitoring and control systems for temperature, atmosphere flow, dew point, oxygen content, belt speed. Etc.</td>
</tr>

Abbott Brazing Furnaces can be designed for a variety of processes.

**Base Materials**
- Stainless Steel
- Carbon Steel
- Copper
- Brass

**Filler Materials**
- Copper
- Copper Alloys
- Silver Alloys
- Nickel Alloys

**Atmospheres**
- Nitrogen
- Hydrogen
- DA
- Endothermic
- Exothermic
- Argon

**Maximum Temperature**
- 1288°C / 2350°F
